The amendment received 6 April 2005 has been made of record. Claims 1-7 and 9-16 are pending.

The rejection under 35 USC 102 contained in the previous office action is withdrawn in view of applicants' amendments.

Claims 1-7, 9, 10 and 13-16 are rejected under 35 U.S.C. 103(a) as being unpatentable over Lerman et al.

This rejection is maintained substantially as set forth in the previous office action with the exception that claims 11 and 12 are no longer included and claims 1-4, 6, 7 and 14-16 are now included.

Applicants' arguments in traverse of this rejection focus on the allegation that the recitation of a specific polyester and melt viscosity imparts patentability to the rejected claims. This argument is not seen as persuasive. It remains the position of the examiner that the recitation of polyesters by the reference renders obvious the use of polyesters as claimed instantly. Polyethylene terephthalate, for example, is one of the most common polyesters and it has aromatic rings. Applicants need point out evidence of record or supply such evidence in affidavit form demonstrating the criticality of the use of the specific polyesters claimed.

Claims 11 and 12 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within

Art Unit: 1714

TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
